1. NATURE AND CONTINUANCE OF OPERATIONS

CMC Metals Ltd. (the “Company”) is incorporated in the Province of British Columbia and its principal activity is the acquisition and exploration of mineral properties in Canada and the United States of America. The Company is listed on the TSX Venture Exchange (“TSX-V”).

The head office, principal address and records office of the Company are located at 605 – 369 Terminal Avenue, Vancouver, British Columbia, Canada, V6A 4C4.

These consolidated financial statements have been prepared on the assumption that the Company and its subsidiaries will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the ordinary course of operations. Different bases of measurement may be appropriate if the Company is not expected to continue operations for the foreseeable future. As at December 31, 2019, the Company had not advanced its properties to commercial production. The Company’s continuation as a going concern is dependent upon the successful results from its mineral property exploration activities and its ability to attain profitable operations and generate funds there from and/or raise equity capital or borrowings sufficient to meet current and future obligations. These uncertainties indicate the existence of a material uncertainty that may cast significant doubt about the Company’s ability to continue as a going concern. Management intends to finance operating costs over the next twelve months with loans from directors, by continuing to pursue additional sources of financing through equity offerings, seeking joint venture partners to fund exploration, monitoring exploration activity and reducing overhead costs.

The financial statements were authorized for issue on February 28, 2020, by the directors of the Company.

2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION**Statement of compliance**

The Company applies International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and Interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”). These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Standard 34, Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by the IASB and interpretations issued by the IFRIC and should be read in conjunction with our audited consolidated financial statements as at September 30, 2019.

3. RECLAMATION BONDS

The Company has a current reclamation bond held in trust by the Bureau of Land Management. As at December 31, 2019, the reclamation bond consisted of a deposit of \$251,433 (September 30, 2019 - \$256,370) made by the Company for indemnification of site restoration on the Bishop Mill Property.

13. FINANCIAL RISK AND CAPITAL MANAGEMENT (cont'd)

- Level 3 – Inputs that are not based on observable market data.

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash held in bank accounts.

The majority of cash is deposited in bank accounts held with one major bank in Canada. As most of the Company's cash is held in one bank there is a concentration of credit risk. This risk is managed by using major banks that are high credit quality financial institutions as determined by rating agencies. The Company's secondary exposure to risk is on its other receivables and reclamation bond. This risk is minimal as receivables consist primarily of refundable government goods and services taxes and the reclamation bond are held with government authorities.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis.

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

The Company has a working capital deficiency and the contractual maturities of all financial liabilities is less than one year.

Foreign exchange risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company does not hedge its exposure to fluctuations in foreign exchange rates.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The fair value of the Company's cash accounts are relatively unaffected by changes in short term interest rates. The Company's debt has a fixed interest rate and is not affected by changes in interest rates.

Capital management

The Company's policy is to maintain a strong capital base so as to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Company consists of equity, comprising share capital, net of accumulated deficit. There were no changes in the Company's approach to capital management during the year. The Company is not subject to any externally imposed capital requirements.

14. CONTINGENT LIABILITY

The Company is subject to a claim made by the Government of the Yukon Territory related to the remediation of the Silver Hart Property (Note 4) pursuant to its exploration program. The Company has accrued a provision of \$146,070 by way of estimating its obligation to remediate the claims but the actual amount of any economic outflow related to this contingency is dependent upon future events and cannot be reliably measured as at December 31, 2019.
