Descubridora zone, emplaced rhyolitic dyke in andesites with associated gold veining.

**Eureka zone, sample 43162
0.5m@Au=1.79ppm, Ag=467ppm,
Cu=0.17%, Pb=7.54%, Zn=6.03%**

- Phase 1 to complete 3,000 meters of step-out drilling from the identified resource.
- Phase 2 of the project envisions an additional 15,000 meters of diamond drill core definition in all three mineralized zones on the property, including the Gavilanes, Central and Western Zones.
- Detailed mapping of the areas to be drilled in phase 2
- Regional mapping/sampling and generation of new drilling targets outside the central zone
